EVALUATION OF LEARNING

Author: Yuri Tricys, Date: June 19th, 2025

AAI SELF ASSESSMENT

Introduction

This self-assessment leverages the most effective learning strategies, including self-directed learning and meta-cognition, to evaluate the creation of a rubric and its accompanying rationale report.

In general, the rubric and rationale report read quite pleasantly, demonstrating a thorough and professional examination from the author that reflects a thoughtful and comprehensive analysis.

Assessment Instrument and Rationale Report

The assessment instrument – the rubric – is authentic, valid, reliable, and bias-free, meeting all technical specifications. The rationale report demonstrates a deep understanding of the instrument, with well-reasoned answers to guiding questions that showcase breadth and depth in analysis.

The report's organization and layout are professional, with articulate, sophisticated, and precise writing.

Strengths and Weaknesses

The assessment instrument and rationale report demonstrate a comprehensive understanding of the subject matter and adhere to best practices, which are clear strengths.

There are, however, some minor weaknesses; but, they are commensurate with the stage of the document, which is pre-production. For example, the table styling could be refined to ensure consistency with the scoring guide, including addressing issues with borders on split rows. Additionally, subtle design issues, such as the need for a more amazingly professional font that pairs excellently with the heading font, inconsistencies in the colours of the colour palette, and font-sizes in the heading text that are out of proportion relative the body text, could be tweaked. Also, the 'Instruct' icon in the top-left header may benefit from a higher initial resolution or replacement with text.

Having said that, if the documents were ear-marked for professional usage, with little effort, they could be transformed into highly polished publishable documents.

Self-Assessment Grade

In accordance with the provided rubric, my opinion is that the assessment instrument and rationale report meet all specified criteria. Given the high quality of the work and the minor nature of the suggested improvements, I assign myself a score of 5% out of 5% for this self-assessment.

Conclusion

The creation of the rubric and rationale report demonstrates a superior, consistent performance, exceeding expectations. With minor refinements, the document can achieve a highly polished and publishable state.

AI Models Used in Report

The ideas, structure, writing, and editing in this paper were performed by the author. Various AI models were used in collecting data, verifying data, and formatting various arguments.
